

Mon May-30			
Time	Chair: Hugo Barbosa	Submission ID	Title
10:30	Opening		
10:40	CT1	34	Extracting Characteristic Areas Based on Topic Distribution over Proximity Tree
11:00	CT2	30	Correlation Financial Networks of an Unstable Stock Market: Empirical Study
11:20	Break		
11:30	CT3	29	On the epidemic threshold of a network
11:50	CT4	26	Dynamics of a network model for inter-phenotypic switching in a bacterial population
12:10	Break		
12:20	Invited talk: Mariana Macedo		Gender differences in mobility and research development
13:00	Lunch break		
	Chair: Hugo Barbosa		
14:00	CT5	19	Building a Reliable, Dynamic and Temporal Synthetic Model of the World Trade Web
14:20	CT6	17	Unifying information propagation models on networks and their influence maximisation
14:40	Break		
14:50	CT7	2	Targeted attacks on the world air transportation network: impact on its regional structure
15:10	CT8	11	Outreach of vaccine-critic content on French-speaking Twitter.
15:30	Break		
15:40	CT9	20	Inferring line failures in complex networks
16:00	CT10	22	Structural biases in university rankings: a complex network approach to bridge the gap

Tue May-31			
Time	Chair: Diogo Pacheco	Submission ID	Title
10:35	Opening		
10:40	CT11	12	Impact of Network Centrality and Income on Slowing Infection Spread after Outbreaks
11:00	CT12	18	A Data-driven Approach to Cattle Epidemic Modelling under Uncertainty
11:20	Break		
11:30	CT13	33	Community Detection Analysis in Multilayer COVID-19 Patient Similarity Networks
11:50	CT14	39	Evaluating the Efficacy of Epidemic Management Strategies using Metapopulation Models
12:10	Break		
12:20	Invited Talk: Fernando Santos		The impact of link-recommendation algorithms in opinion polarisation
13:00	Lunch break		
	Chair: Diogo Pacheco		
14:00	Invited Talk: Hywel Williams		Online media, complex networks and climate change
14:40	Break		
14:50	CT15	23	Co-attention based Multi-contextual Fake News Detection
15:10	CT16	24	Feature-rich multiplex lexical networks and artificial intelligence quantify cognitive strategies of early language learning
15:30	Break		
15:40	CT17	31	The impact of textual content on link prediction in online social networks
16:00	CT18	32	Self-induced emergence of consensus in social networks: Reddit and the GameStop short squeeze

Wed Jun-1			
Time	Chair: Liam Berrisford	Submission ID	Title
10:35	Opening		
10:40	CT19	4	Broadcast Graphs with Nodes of Limited Memory
11:00	CT20	6	Interdependent superconducting networks
11:20	Break		
11:30	CT21	9	Statistical assessment of the sequentially local structure in graphs
11:50	CT22	13	Investigating the Origins of Fractality Based on Two Novel Fractal Network Models
12:10	Break		
12:20	CT23	16	Effect of directed edges in graph spectra
12:40	CT24	35	Community-based method for extracting backbones
13:00	Lunch break		
	Chair: Sima Farokhnejad		
14:00	CT25	10	Characterization of interactions' persistence in time-varying networks
14:20	CT26	8	Linking the Watts threshold model and network game: An application to the spread of competing goods
14:40	Break		
14:50	CT27	3	Measuring Equality and Hierarchical Mobility on Abstract Complex Networks
15:10	CT28	1	The biased-voter model: How persuasive a small group can be?
15:30	Break		
15:40	Invited Talk: Adilson Motter		Complex Contagion: Unfolding and Control
16:20	Closing
